## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 3, 4, 8, 9, 15-19, and 21-27, drawn to a programmable controller including a means of access to state data storage units that enables a monitoring device to read data values from the data storage units and to write data values to the state data storage units while a user control program continues to perform control functions.
  - II. Claims 10-14, drawn to a programmable controller including a means to support failure detection.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in a programmable controller that does not include a means to support failure detection. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

3. A telephone call was made to John C. Holman on 7/24/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
